An aerial photograph of a rural landscape, likely in Japan, showing a network of roads, fields, and forested areas. The map is overlaid with numerous red and pink lines delineating property boundaries. Many of these boundaries are labeled with numerical parcel identifiers. A prominent blue line, possibly a river or a major road, runs diagonally across the upper left. Several areas are highlighted in yellow, including a cluster of parcels in the center-right and a smaller area in the lower right. The terrain is a mix of green fields, brownish soil, and dense green forest. Some buildings and structures are visible, particularly along the roads and near the highlighted areas. The overall layout suggests a cadastral or land management map.
